

**MERCK**

## Are you GMP compliant until the end?

Make sure your equipment is under control up to its final day of use thanks to our End of Life Verification Service!

As stated by GLP 21 CFR 58.63 (FDA), USP <1058> and EU GMP vol. 4, 3.41, it is required that your instrument is verified until its last day of usage.

- Are you checking your equipment prior to decommissioning?
- Are you sure it was under control until the last day?
- Are you performing and documenting the proper decommissioning test performance?

Benefit from our End on Life Verification Service, which can be completed at your location or in our local repair center. You'll receive a performance report to prove that your equipment was under control until its last day of operation.

Our End of Life Verification Service is available for our Milliflex® instruments, Steritest® pumps, MAS and RCS® air sampling systems.

For more information, please contact your local sales representative, or get in touch with us using this webpage:
