

Dangerous Goods

Due to the inherent risks of transporting hazardous materials by air, road, rail, or sea, dangerous goods transportation is a highly regulated activity across the globe.

- United Nations: Recommendations on the Transport of Dangerous Goods - Model Regulations (Orange Book),
- By Air: IATA Dangerous Goods Regulations (DGR) and the ICAO Technical Instructions (TI)
- By Sea: IMDG Code (International Maritime Code for Dangerous Goods)
- By Ground: ADR (European Agreement concerning the International Carriage of Dangerous Goods by Road) and DOT (Department of Transportation) Regulations 49 CFR
- Others e. g. RID (rail) and ADN (inland waterways)

We protect the health and safety of our employees, customers, and business partners by eliminating risks posed by hazardous goods in transit through the implementation of effective compliance programs, providing accurate dangerous goods relevant data, ensuring packaging compliance, and strong intradepartmental collaborations.
