

**GOAT ANTI-HUMAN Ig lambda CHAIN SPECIFIC
HRP CONJUGATED
POLYCLONAL ANTIBODY**

CATALOG NUMBER:	AP506P	QUANTITY:	1.0 mL
LOT NUMBER:			
EPITOPE:	Ig lambda light chain	HOST/ISOTYPE:	Goat
BACKGROUND:	Antibody molecules typically comprise two immunoglobulin light chains covalently bound to a pair of heavy chains. Immunoglobulin light chains occur in two types, designated by the Greek letters kappa and lambda. Kappa and lambda light chains are approximately 250 amino acids in length with an average mass of about 25 kDa. The ratio of kappa to lambda found in the immunoglobulin population varies by species.		
SPECIFICITY:	The antibody reacts with human lambda light chains as demonstrated by ELISA and flow cytometry.		
APPLICATIONS:	<u>ELISA:</u> 1:4,000-1:8,000. <i>Optimal working dilutions must be determined by the end user.</i>		
SPECIES REACTIVITY:	Reacts with human lambda light chains. Absorbed for human myeloma proteins with kappa light chains. Reactivity with other species has not been determined.		
IMMUNOGEN:	Prepared from pooled antisera from goats hyperimmunized with human myeloma proteins with λ light chains.		
PRESENTATION:	Purified by affinity chromatography on pooled human Igs with λ light chains covalently linked to agarose. Liquid in 50% glycerol/50% PBS, pH 7.4.		
STORAGE/HANDLING:	Maintain refrigerated at 2°-8°C under sterile conditions for up to twelve months from date of receipt. For long term storage, aliquot and store at -20°C. Avoid repeated freeze/thaw cycles.		
Important Note:	<i>During shipment, small volumes of product will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 μL or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap.</i>		

**FOR RESEARCH USE ONLY; NOT FOR USE IN DIAGNOSTIC
PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION**

Unless otherwise stated in our catalog or other company documentation accompanying the product(s), our products are intended for research use only and are not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.
